MD. TAABISH NASIM

Java Backend Developer | Spring Boot | REST APIs | MySQL

Bengaluru, Karnataka | +91 9007005696 | nmt040325@gmail.com

LinkedIn | GitHub

PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience building RESTful APIs and web applications using Java, Spring Boot, Hibernate, Servlets, JDBC, and MySQL. Currently interning as a Backend Developer at TAP Academy, developing production-style REST APIs and database-driven services. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and relational database design, with practical experience in Docker-based deployment and Git/GitHub version control. B.Tech Computer Science graduate (2025) seeking an entry-level Java Developer role to build scalable, reliable backend systems.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), SQL, JavaScript
Core Java: OOP, Collections, Exception Handling, Multithreading, JDBC, Servlets (Jakarta EE), Data Structures & Algorithms
Frameworks: Spring Boot, Spring MVC, Hibernate, React.js
Backend & APIs: RESTful API Design, CRUD, JSON, HTTP, Postman
Database: MySQL (Schema Design, Joins, Stored Procedures, Query Optimization)
Web Technologies: HTML, CSS, JavaScript, React.js
Tools: Git, GitHub, Docker, Apache Tomcat, IntelliJ IDEA, Eclipse, VS Code, Maven

INTERNSHIP EXPERIENCE

Backend Developer Intern — TAP Academy

- Build and maintain RESTful backend services in Java and Spring Boot as part of a live full-stack development track.
- Design and implement CRUD APIs backed by MySQL, applying schema design, joins, and indexing to keep data access fast and reliable.
- Write clean, testable Java code following OOP principles; collaborate in an Agile/Scrum workflow with regular peer code reviews.
- Validate and debug APIs with Postman, and manage version control and collaborative development through Git and GitHub.

PROJECTS

My Web Calculator — Java Web Application

Java, Servlets (Jakarta EE), HTML, CSS, JavaScript, Docker, Apache Tomcat | github.com/YOUR-GITHUB-USERNAME

- Developed a web-based calculator using Java Servlets to handle HTTP requests and responses, including dynamic multiplication-table generation logic.
- Implemented server-side input validation and exception handling to ensure reliable processing of user requests.
- Designed an interactive, responsive user interface with HTML, CSS, and JavaScript.
- Containerised the application with Docker and deployed it on Apache Tomcat for consistent, portable delivery.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering — CGPA: 7.92/10
Budge Budge Institute of Technology (MAKAUT), Kolkata | Graduated 2025

CERTIFICATIONS & ADDITIONAL INFORMATION

- Java SE 11 Developer (1Z0-819) Certification Prep — LinkedIn Learning (Aug 2026)
- Introduction to Gen AI with Snowflake — Snowflake, Inc., LinkedIn Learning (Aug 2026)
- Java 17 Masterclass — Udemy (May 2024)
- Linux Command-Line & Shell Scripting — Udemy (June 2024)
- Development Using Java — Udemy (June 2022)
